13	Ron Crisostomo, DRRMO, Infanta	Masyadong tataas ang tubig sa Infanta sa oras ng tag-ulan kapag may dam; malapit sa Infanta Segment of the Philippine Fault Zone ang pagtatayuan ng dam; Hindi ganoon katibay ang dam kung gawang China; malaki ang posibilidad ng sedimentation sa delta	Engr. N.M. Ortigas: Kasama ang climate change, earthquake at baha sa aming pag-aaral, Hindi aaprubahan ng MWSS at ng EDCOP ang anumang detalye ng plano na maglalagay sa mga tao sa panganib; Engr. L.C. Cleofas: Nasagot na ng MWSS ang sinasabing sulat at position paper ni Mayor America.	The project needs clearance from PAMB first before anything else. There is a high possibility of sedimentation at the delta.	Climate Change, earthquake and flooding are all included in the plan; MWSS will not approve the proposal if it would harm or put anyway in an unsafe environment; Regarding the position paper of Infanta, MWSS has replied to the letter of Mayor America.

19	Thelma Aumentado, Gen. Nakar	Bigyan ng long term na benepisyo ang mga katutubo, hindi lang short term; Bigyan kami ng kopya ng mga dokumento bago pa dumating ang 4th assembly ng FPIC; Isama ang mga katutubo sa MOA na sinasabi sa pagitan ng MWSS, DENR at LGU; Magkaroon pa rin ng hiwalay na Indigenous Peope Development Plan, at huwag pagisahin kasama ng Community Development Plan; Paggalang sa aming customary laws, lalo na sa mga pulong ng PAMB.	O.B. Catilo, PAMB Infanta: Lagyan dapat ng parameters ang customary laws ng IPs; Patuloy ang paggalang ng PAMB sa priority rights ng IPs; Malabnaw ang Community Development plan na sinasabi, mas mainam ang pagkakaroon ng Comperehensive Development and Management Plan (CDMP) gaya ng ginagawa sa PAMB.	Give the IPs not only short term, long term benefits; Give the IPs copies of the documents before the 4th assembly in Gen. Nakar; Include the OPs in the MOA that will be signed between MWSS, DENR and LGU; Develop a separate plan for the IPs such as the IPDP; respect the customary laws of IPs, particularly in the PAMB meetings.	
20	Rogelio Valencia, Gen. Nakar	Ano ang kasiguruhan ng mga nasa ibaba ng ilog?		What assurance can be given to those in the dowsntream?

22	Alfredo Tangag Jr., Infanta	Ano ang mitigation measure para sa pinsala sa buhay at kabuhayan na maaaring idulot ng dam sakaling magkaroon ng isang panganib?	Engr. N.M.Ortigas: Idedesenyo ang dam para malampasan ang anumang lindol o panganib. Susundin rin ang international standards ng International Commission on Large Dams at World Commission on Large Dams para gawing matibay at ligtas ang Kaliwa Dam.	What mitigating measure can be placed to cover the affected lives and livelihood by the risks that are related with the dam?	The dam will be designed in a manner that it will exceed the minimum standards set to withstand earthquake an other hazards; such that, the standards are based on the Internationa Commission on Large Dams and the World Commission on Large Dam.
24	Efren Danao, Kagawad ng Daraitan	Mga kahilingan: Paglalagay ng break water palibot sa Daraitan; Maiayos ang mga basura at banyo ng barangay; Mayroon bang share na matatanggap mula sa proyekto?	Engr. L.C. Cleofas: Itinala ang mga kahilingan; Magbibigay ang MWSS ng mga proyekto kaysa sa royalty tax.	Requested for the following: Development of break water around Daraitan; putting up of waste and sanitation management system; share from the project.	Engr. L.C. Cleofas: Noted the requests; MWSS shall provide projects instead of royalty tax.
28	Demosthenes Raynera, Executive Director ng Tribal Center for Development,	Aalisin o irerelocate ba ang mga taga-Daraitan dahil sa nasabing maidulot ng mga kabahayan sa pagdumi ng tubig sa ilog?	Engr. N.M. Ortigas: Pag-aaralan pa kung irerelocate ang mga kabahayan. Pero sa ngayon, hindi pa kinakailangan. Isasaayos	Will the Daraitan residents be transferred or relocated due to the mentioned negative effect on the water quality in the river?	Relocation will still be subject to furhter studies. However, as of the moment, relocation has not been an option

	representative of the Infanta Parish		nalang ang waste treatment plant, septic tank at drainage.		for Daraitan because of the plan to put up a waste treatment plant, as well as septic and sewerage / drainage systems.
29	Lery-Ann San Jose Cerenio, Barangay Pagsangahan, Gen. Nakar	seguridad sa naaangkop na trabaho; paghingi ng ID o dokumento sa mga dadaan sakaling malagyan na ng tulay ang Daraitan; Patuloy na turismo sa Daraitan; paglalagay ng eskwelahang may sapat na teknolohiya.	Engr. L.C. Cleofas: Nilakad na ng MWSS para sa susunod na taon maitayo ang eskwelahan sa Cablao; Hindi kailangan ng ID para makatawid sa tulay na gagawin	appropriate job security; ID as a pre-requisite upon use of the bridge the will be constructed in Daraitan; support to Daraitan tourism activity; putting-up of a school with the necessary technology for learning.	MWSS has arrangements with DPWH on the bridge and school construction; No ID will be required before person can enter the barangay once the bridge has been constructed.

8	Conrado Vargas, Executive Director of Prelature of Infanta Community Organization of the Philippines	Paano mae-ensure na walang masisirang kapaligiran sa pagtatayo ng dam? Ilang taon pa bago mapalitan lahat ng punong puputulin o malulubog para maitayo ang dam?	Art (Arsenio Pasion Jr.): Sa bawat isang puno, magtatanim ng 100 para sa rehabilitasyon at watershed management. Pero minsan wala na tayong magagawa, iyon ang nasa batas.	How can the project ensure that the environment would not be compromised?	
21	Ryan Sollano, Infanta	Mayroon din bang Wildlife Management Plan para sa mga hayop na maapektuhan ng dam? Anong kasiguruhan na lahat ng ipapalit na puno sa mga maapektuhan na lugar ay mabubuhay talaga?	Engr. N.M. Ortigas: Mayroong Environmental Management and Monitoring Plan at Environmental Rehabilitation and Reconstruction Plan na lalamanin ang mga nasabi.	Is there a Wildlife Management Plan also for the animals that will be displaced in the process? What is the assurance that all destroyed trees will be successfully replaced?	Engr. N.M. Ortigas: The Environmental Management and Monitoring Plan and Environmental Rehabilitation and Reconstruction Plan will all contain the said concerns.

3	Demosthenes Raynera, Executive Director ng Tribal Center for Development, representative of the Infanta Parish	Paki-tingnan ang papel sa NEDA na nagsasabing hindi viable ang Kaliwa Dam; Totoo ba na ang buhay ng dam ay lima hanggang anim na taon lamang?	Engr. Jo Pilsan, NEDA 4A: Ang mga kalsada po ay may 20 na taon na bisa, so mas matagal ang dam dahil mas malaki itong proyekto. Mas maalam ang NEDA Central Office at ang MWSS para masagot ito' Engr. N.M. Ortigas: Ang minimum economic life ng dam ay 25 years. Pero kung titingnan ang Angat Dam, 1968 pa ito at hanggang ngayon ay ayos pa rin. Ang gagawin ng MWSS ay pangmatagalan na hindi makakasira sa kalikasan.	According to a report from NEDA, Kaliwa Dam was not viable; Is it true that the dam life is only 5 to 6 years?	Roads have 20 years life span, how much more for dams? NEDA Central Office and MWSS are in the best position to answer this; the minimum economic life of a dam is 25 years. MWSS will only invest in projects that are sustainable and environment-friendly, like in the case of Angat Dam that was built in 1968 and is still well-maintained until now.
4	Demosthenes Raynera, Executive Director ng Tribal Center for Development, representative of the Infanta Parish	Hindi ba isusunod ang Laiban Dam pagkatapos ng Kaliwa Dam?	Engr. L.C. Cleofas: Inaprubahan ng NEDA Board ang proyekto base sa pag-aaral ng ICC Technical Committee na nagpatunay na viable ang Kaliwa Dam. Ang na-aprubahan ay Kaliwa Dam at hindi Laiban Dam.	Will Laiban Dam be constructed next after Kaliwa Dam?	The NEDA Board only approved Kaliwa Dam and not Laiban Dam.
7	Conrado Vargas, Executive Director of Prelature of Infanta Community	Sa ibang pag-aaral ng isang Japanese Firm, 150m at hindi	Engr. N.M. Ortigas: Ang pinagbasehan ng 150m na iyan ay malamang ay NAMRIA	In the study presented by a Japanese firm,	150 m was maybe due to the NAMRIA topographic map, dated 1954. When we

	Organization of the Philippines	170m ang elevation ng Daraitan.	topographic map, dated 1954 o lumang pag-aaral na. Pero nang bumaba kami sa ilog, 162m ang nakuha naming elevation. Aktwal na sukat ito.	Daraitan has an elevatio of 150m and not 170 m.	verified the river, we were able to get 162m elevation as the actual elevation measurement based on an instrument survey.
25	Conrado Vargas, Executive Director of Prelature of Infanta Community Organization of the Philippines	Masyadong delikado ang dam na may 62 meters na taas; hindi pwedeng i-hiwalay ang operations sa construction ng dam.	Engr. N.M. Ortigas: Ang bumabagsak na dam ay ang hindi sumunod sa standards ng safety; 1 is to 10,000 ang probable maximum flood kaya napakalaki ng safety allowance ng gagawing struktura.	Dam height of 62 meters poses a great danger to the people; MWSS must not separate the operations from construction phase.	Dams that collapse are not based on standard safety measures; the probable maximum flood is 1:10,000 which provides a very high safety allowance.
